About ORION

ORION International Technologies, Inc. (ORION) is a technology company that provides support to private and public entities, including New Mexico state government, federal agencies, and the national laboratories. ORION was founded in 1985 by CEO Dr. Miguel Ríos, Jr. and is composed of over 120 employees who solve the simplest to the most complex technology issues for various clients.

Information Technology

ORION has over 24 years of experience in technology services. We provide a wide range of software development services, including system integration and information technology consulting.

Mission

To provide quality resolution to any technical issue.

Expertise

We have the expertise to design, develop, and deploy customized software solutions for commercial and government customers.

Keys to Success

We have been innovators in software development since 1985 in all areas of government and private sector technology. Our growth can be attributed to our successes.

We started as a three-man business. We presently have over 120 people who have outstanding education, talents, and experience.

People

What ORION Can Do for You

- Ask the right questions. We know state government processes.
- Work within your means by assessing your needs and current hardware/software capabilities to solve your immediate problems.
- Work closely with your staff to transfer business and technical knowledge of the systems we implement.
- Provide in-state, technology support.

Partners

We have had established business alliances with "best-in-class" software technology companies to provide software and technical solutions based on their leading software platform.

CA: ORION established a systems integration partnership with CA in 2008. CA's solutions cover all aspects of service and system management. We are focusing on Application Performance Management and IT Project and Portfolio Management.

IBM Corporation: ORION is a member of IBM's Partnerworld for Software providing the WebSphere platform for e-business software solutions. We resell and provide professional services to support this suite of industry leading e-business infrastructure products.

Sybase: ORION entered into the Sybase partnership in 1995. For seven years we leveraged that partnership to provide technical and software development services using Sybase's software development tools and database management systems. We continue to support Sybase products at our customers.

Processes

- **Quality:** We utilize our expertise and proven processes to understand and implement your initiatives.
- **Documentation:** We provide deliverables that address your needs and communicate our approach to solutions.
- **Training:** We prepare users to effectively adopt and use new technology.
- **Continuity of Support:** New Mexico is our home base and we are committed to provide the best support to our clients.

Technology

Capabilities

ORION applies "cutting edge" technology and sound business practices in the following areas:

- Web-Based and Client/Server Applications
- Database Design, Development, and Maintenance
- Systems Integration
- Project Management
- Software Support
- Independent Verification and Validation (IV & V)

Solutions

- **Enterprise Architecture:** Working with an application portfolio to better support business objectives
- **Application Development:** Quality is number one, with rapid deployment, and value to all our application processes.
- **System Implementation/Integration:** Merging data and applications.
